

ENVIRONMENTAL

Impact

ReFiber transforms textile waste into verifiable environmental outcomes, enabling citizens, ULBs, brands, and Institutions to track recycling volumes, material recovery, and emissions reduction with confidence.

VERIFIED TEXTILE

RECYCLING

PLATFORM

Who ReFiber Serves

Citizens :

Easy, responsible clothing recycling with visibility into environmental impact.

Governments & Cities :

Structured textile waste systems with verified data for reporting.

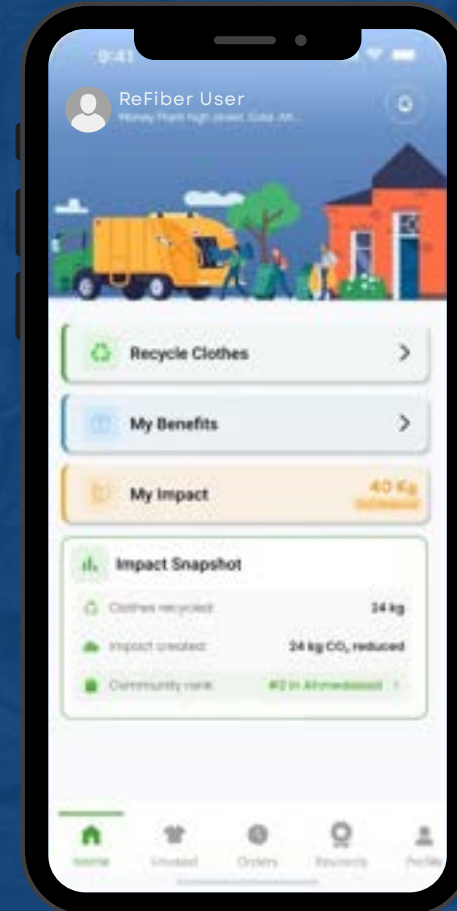

Brands & CSR Partners:

Credible circularity outcomes aligned with sustainability goals.

Recyclers & Collectors:

Traceable material flows and formalised operations.

Recycle Clothes. Earn Benefits.

ReFiber is a digital platform that enables transparent, traceable recycling of post-consumer textile waste.

"RESPONSIBILITY DOESN'T END WHEN OWNERSHIP DOES."

This product is printed on recycled paper to support a more sustainable future.

REFIBER CONNECTS
STAKEHOLDERS TO CREATE
CIRCULAR TEXTILE IMPACT.

What ReFiber Does

Enables the formal collection of used textiles.

Ensures responsible recycling through verified partners.

Provides digital tracking using QR codes/RFID/NFC tags.

HOW REFIBER WORKS

1

Collection

Citizens place a recycle order on Re-Fiber app, and an Oterri rider collects it.

2

Aggregation

Textiles are sorted and logged at designated hubs on the ReFiber platform.

3

Recycling

Verified recyclers convert textiles into new material streams.

4

Verification (MRV)

Every step is digitally recorded for transparency and accountability.
